		Examiner		Art Unit					
		LEE D WIL		3723					
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

Page 2

1

#### Election/Restrictions

- 1. Applicant's election without traverse of Group I ,claims 1-10 and 17-22 in the reply filed on 12/23/04 is acknowledged.
- 2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## **Drawings**

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because these drawing are of poor line quality and are considered to be informal. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 09/903,052 Page 3

Art Unit: 3723

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1, 6, 8-10, 17-18, and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Saldana et al (20020146970a1).

Saldana et al teach a method having a cmp system (figs.1-48), a plurality of tolerances (par.95), determining limits exceed by measuring thickness (par.193, abstract), tolerance limits are exceed by thickness (pars. 159-164), a metrology station (par.162and 170); and And polishing based off the results of a determining step (see par.176 and claim 1)).

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 2 rejected under 35 U.S.C. 103(a) as being unpatentable over Saldana et al (20020146970a1) in view of Greene et al (5679055).
  - Saldana et al are discussed above except for having a cassette for holding substrates.

Application/Control Number: 09/903,052 Page 4

Art Unit: 3723

b. Green et al teaches the use of a cassette (C1) in storing substrates in cassette which allow a pluarity of substrates to be transported to the polishing carrier to be processed.

- c. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Saldana et al device by providing a cassette as taught by Greene et al which would allow a plurality of substrates to carried and processed.
- 5. Claim 4 rejected under 35 U.S.C. 103(a) as being unpatentable over Saldana et al (20020146970a1) in view of Williams et al (5664985).
  - d. Saldana et al are discussed above except for a warning signal.
  - e. Williams et al teach the use of a warning signal (abstract) which is used to limitations concerning input variables are exceeded.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Saldana et al device by providing a a warning signal as taught by Williams et al which would allow for a warning system when input values are going to be exceeded.

#### Allowable Subject Matter

6. Claims 3, 5, 7, 19-20, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

Application/Control Number: 09/903,052

**Art Unit: 3723** 

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Birang et al disclose a device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEE D WILSON whose telephone number is 571-272-4499. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JOSEPH HAIL can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). Mulfell
